**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 6, 14, 16, 17, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Goukura et al. (5,243,412).

Regarding claim 1, Goukura discloses a clock signal generating circuit showing a clock generating means (Figures 6a and 6b), a color phase detecting means (8, 9), a color difference calculating means (11), a sampling phase conversion means (30, 13, 25, 7, 4), and a luminance/chrominance separation means (67).

Regarding claim 2, see gate circuit 9.

Regarding claim 3, in addition of above, the SW1 in Figure 8 meets the color demodulating means as claimed.

Regarding claim 6, see col. 8, lines 33-38.

Regarding claim 14, the Y/C separation means in Figure 8 inherently includes a comb filter.

Regarding claim 16, see Figures 6a and 6b.

Regarding claim 17, note col. 8, lines 39-45.

Regarding claims 19 and 20, Goukura is intended for a video signal display device or a video signal recording device.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Goukura et al. (5,243,412).

Regarding claim 15, Goukura does not specify the clock frequency of the clock generating means as claimed. In any event, since the oscillation frequency of the oscillator (53,14) can be changed to any value, changing the frequency to the claimed frequency would have been a matter of design choice. It would have been obvious to one of ordinary skill in the art.

***Allowable Subject Matter***

5. Claims 4-5, 7-13 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Lee whose telephone number 571-272-7349. The examiner can normally be reached on Monday through Thursday from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sinh Tran, can be reached on 571-272-7564. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
